Office Action Summary

Application No.

10/763,424

Applicant(s)

KARLIK ET AL.

Examiner

Maher M. Haddad

Art Unit

1644

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-59 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-59 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-24 and 46-59, drawn to a method of promoting remyelination of nerve cells or reversing paralysis in a mammal comprising administering a remyelinating agent, classified in Class 424, subclass 131.1.
- II. Claims 25-29 and 38-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent; classified in Class 530, subclass 388.22 and Class 532, subclass 1.
- III. Claims 25-35 and 38-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent, wherein the second agent is a compound of formula I; classified in Class 530, subclass 388.22 and Class 532, subclass 1.
- IV. Claims 25-35 and 38-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent, wherein the second agent is a compound of formula IA; classified in Class 530, subclass 388.22 and Class 532, subclass 1.
- V. Claims 25-36 and 38-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent, wherein the second agent is a compound of formula IB; classified in Class 530, subclass 388.22 and Class 532, subclass 1.
- VI. Claims 25-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent, wherein the second agent is a compound of formula IC; classified in Class 530, subclass 388.22 and Class 532, subclass 1.
- VII. Claims 25-35 and 38-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent, wherein the second agent is a compound of formula II; classified in Class 530, subclass 388.22 and Class 532, subclass 1.
- VIII. Claims 25-35 and 38-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent, wherein the second agent is a compound of formula IIA; classified in Class 530, subclass 388.22 and Class 532, subclass 1.
- IX. Claims 25-36 and 38-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent, wherein the

Art Unit: 1644

second agent is a compound of formula IIB; classified in Class 530, subclass 388.22 and Class 532, subclass 1.

- X. Claims 25-34 and 37 and 38-45, drawn to a combination therapy comprising a therapeutically effective amount of a remyelinating agent and an anti-inflammatory agent, wherein the second agent is a compound of formula IIB; classified in Class 530, subclass 388.22 and Class 532, subclass 1.

2. Groups II-X are different products. Various remyelinating agents and combination thereof differ with respect to their structures and physicochemical properties; therefore each product is patentably distinct.

3. Groups I and II are related as product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the combination therapy of Group II can be used for treating an inflammatory disease, in addition to the methods of promoting remyelination of nerve cells recited.

4. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Therefore restriction for examination purposes as indicated is proper. Further, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention.

Species Election

5. Irrespective of whichever group applicant may elect, applicant is further required under 35 US 121 (1) to elect a single disclosed species to which claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

- A. If Group I is elected, applicant is required to elect a single specific anti-inflammatory/immunosuppressant agent such as those recited in claims 20 and 57, if corticosteroid is elected, applicant is required to elect a single specific corticosteroid such as those recited in claims 22 and 59. These anti-inflammatory agents are distinct species because their structures and modes of action are different. Further, Applicant is required to elect a single specific condition such as those recited in claims 3 and 47. These species

Art Unit: 1644

are distinct because the pathological conditions differ in etiologies and therapeutic endpoints; thus each condition represents patentably distinct subject matter.

- B. If any one of claims Group II-X is elected, applicant is required to elect a single specific anti-inflammatory agent such as those recited in claim 38, if corticosteroid is elected, applicant is required to elect a single specific corticosteroid such as those recited in claim 40, if a non-steroidal anti-inflammatory drug is elected, applicant is required to elect a single specific species such as the one recited in claims 41-42. These anti-inflammatory agents are distinct species because their structures and modes of action are different.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

6. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier.

Art Unit: 1644

Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maher Haddad whose telephone number is (571) 272-0845. The examiner can normally be reached Monday through Friday from 7:30 am to 4:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841. The fax number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
